**Subject:** Your drinking water could be at risk, Jeremy

[1 in 3 Americans could drink dirty water if the Trump Administration succeeds. Act now!](#)

Jeremy,

The 2015 Clean Water Rule guarantees safe drinking water for 117 million people from coast to coast.

But what did President Trump call it?

***“One of the worst examples of federal legislation.”***

And now he’s given Scott Pruitt, head of the Environmental Protection Agency (EPA), the power to rewrite the rule — and give developers, fertilizer and pesticide makers, oil and gas producers, and others the chance to put profit over safety.

Americans is at risk. More than 13,000 of your fellow supporters have already expressed their outrage at Administrator Pruitt. Today, I need you to join them in the fight.

**Add your voice by August 28th while there's still time for comments. Tell Administrator Pruitt that — as the federal guardian of our water, land, and air — it's his duty to protect, not contaminate, Americans' drinking water.**

TAKE ACTION »

Together, we — you, I and American Rivers — are a mighty force for clean water.
